

KAPITAN ENGINEERING, INC.

Cable Networks/Land Surveying

Civil Engineering Technician

One to two positions available for a recent or upcoming graduate with a 2-year technical degree in civil engineering technology or similar program. Applicants should have a minimum of 2 to 3 years experience in utility design, field inspection, and project management. Recent experience with construction fiber optic telecom cable facilities and road projects needed. Roadway design a plus. Applicants should know roadway construction methods, possess good skills with interpreting road plans, survey plats, and utility construction drawings. Applicants must also be highly proficient in AutoCAD computer drafting and Microsoft Word, Excel. Microstation experience is a plus.

Responsibilities will include CAD drafting, field staking, inspection, and acceptance testing for utility projects in southern and central Wisconsin. Will also assist our surveying department with highway construction staking projects. Dependent on knowledge and experience, duties will also include planning and construction of cable facilities for telecom service providers, designing fiber optic PON networks, preparing project plans and specifications, working with utility contractors, coordinating projects with WisDOT and other utilities, and construction project management and permitting.

Located near Madison, Kapitan Engineering, Inc. is a communications network design firm that offers competitive wages.
